Training Announcement

LAW ENFORCEMENT RESPONSE TO WMD OPERATIONS LEVEL PER 225-1 Train-the-Trainer

The operational WMD Response for Law Enforcement course addresses specific fundamentals and skills associated with an emergency response to a WMD incident. The course provides detailed technical information and includes hands on practice of required procedures.

Throughout the course, participants are reminded of the necessity of teamwork among all responding agencies because as emergency responders, they must support and facilitate the operations of fire, and medical services, and other responding agencies.

The course prepares representatives of state, county, and municipal emergency response agencies to perform a critical emergency responder role safely and effectively during an incident involving WMD agents.

NOVEMBER 7,8,9, 2006

at the NH Police Academy
17 Institute Drive
Concord, NH

For more information or to register for the class, please contact:

Capt. Jeff Noyes
(603) 271-2133

NOTE* All applicants must be full time police, fire or emergency medical services . During one of the training modules, the student will be using an APR. Please note in the application whether you will be bringing an APR or not. We have a limited amount of these to loan. The training is limited to 30 people and requires a 3 day full commitment. This is an excellent class for supervisors to attend.
